

WHAT TO LOOK FOR IN A PRE-FABRICATED MOMENT FRAME

PRE-ATTACHED WOOD NAILER

For shear transfers, connector attachments, surface finish nailing and backing

HOLLOW STRUCTURAL SECTION (HSS)

Resists lateral and torsional buckling to eliminate bracing requirements for Special Moment Frames.

SIDEPLATE TECHNOLOGY

AISC 358 Certified special moment connection provides efficiencies to reduce column and beam section for minimal weight and dimensions

OPTION FOR PRE-ASSEMBLED, PRE-WELDED MOMENT FRAME

For fast installation and maximum quality control

OPTIONAL COLUMN SPLICE

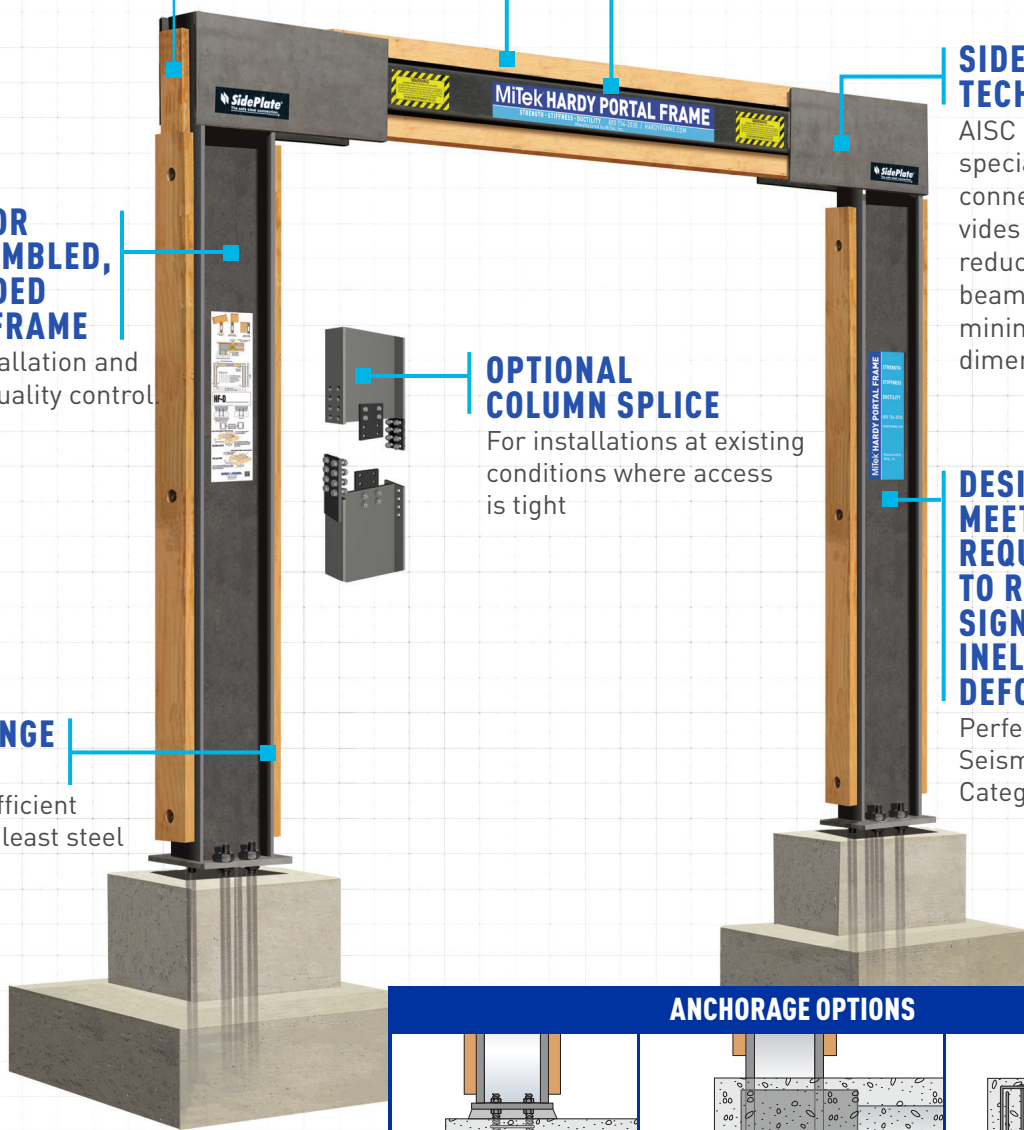

For installations at existing conditions where access is tight

DESIGNED TO MEET SMF REQUIREMENTS TO RESIST SIGNIFICANT INELASTIC DEFORMATION

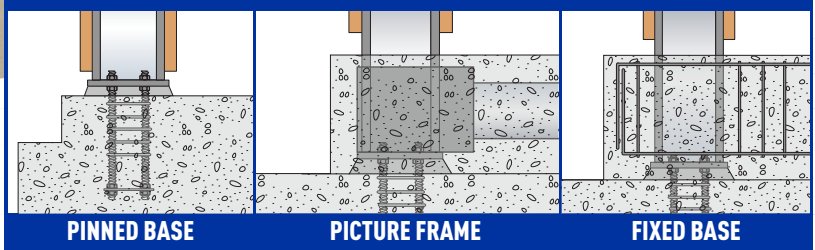

Perfect for use in high Seismic Design Categories

WIDE FLANGE COLUMNS

provide an efficient section with least steel weight
